SECTOR EXPOSURE BY SOURCE OF REVENUE⁴

GEOGRAPHICAL EXPOSURE BY SOURCE OF REVENUE⁴

¹ Comprised of all Global Equity strategies managed by Magellan Investment Partners.

² Inception date of the Fund (Class 1) is 8 October 2013.

³ Outperformance consistency indicates the percentage of positive excess returns for rolling 3 year returns since inception.

⁴ Sectors are internally defined. Geographical exposure is calculated on a look through basis on underlying revenue exposure of individual companies held within the portfolio. Exposures may not sum to 100% due to rounding.

[#] Shares are denominated in USD. This presents certain risks relating to currency conversion if an investor's financial activities are denominated principally in a different currency, for example, Euro. These include the risk that exchange rates may significantly change. An increase in the value of the investor's currency against USD would decrease the investor's currency equivalent value of the Net Asset Value and Net Asset Value per Share.

The Fund aims to preserve capital and reduce downside volatility risk and offers investors an opportunity to invest in a focused global equity fund, through a portfolio comprising 20 to 40 securities in high quality companies. The Fund is actively managed with investment decisions made on a fully discretionary basis. However, the portfolio is designed to have lower historical volatility than that exhibited by world equity markets, as measured against the MSCI World Index. Therefore, the Fund can be said to be managed by reference to the MSCI World Index, but as a performance reference benchmark only. The MSCI World Index is a free-float adjusted market capitalization weighted index that is designed to measure the equity performance of 24 developed markets. Index results assume the reinvestment of all distributions of capital gain and net investment income using a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties.
